

Accolade Elm

Height:	50-60 Feet
Width:	30-40 Feet
Shape:	Vase shaped
Foliage:	Glossy deep green
Flowers:	Some non-showy flowers will develop in the early spring.
Fruit:	Wafer-like samaras by late May.
Description:	Accolade™ elm is a vigorous, large-maturing hybrid with the classic, vase-shaped habit of the American elm. Once thought of as the ideal large tree for cities, the American elm has long arching branches that formed allées, offering shade for hot city streets.
Fall Color:	Yellow
Advantages:	This elm is noted for its glossy, dark green leaves. That foliage provides plenty of shade throughout the growing season. The Accolade's spectacular green leaves transform into a golden yellow color in the fall.
Site & Culture:	Grow in average, medium moisture, well-drained soils in full sun. Tolerant of light shade. Prefers rich, moist loams. Adapts to both wet and dry sites. Generally tolerant of urban conditions.
