

American Sentry Linden

Height: 40-45 Feet

Width: 25-30 Feet

Shape: Pyramidal

Foliage: The leaves are textured with serrated edges, with a dark green on top with lighter tones underneath

Flowers: In spring, clusters of sweetly fragrant pale-yellow flowers grace its branches.

Fruit: As summer progresses, you'll enjoy watching woody, pea-sized seeds form.

Description: The American Sentry linden is a dense shade tree with heart-shaped leaves and fragrant flowers. This cultivar is particularly symmetrical and is reported to have some resistance to Japanese beetle.

Fall Color: Yellow

Advantages: Very Adaptable, Strong branching, Symmetrical form

Site & Culture: American Sentry® Linden is an extremely tolerant tree, tolerant of cold Chicago area winters, alkaline soil, dry and wet sites. This is a hardy native selection that can grow in almost any condition.
